

4. Commenting on a survey

When working on the survey you now have the opportunity to add internal comments. These comments may be useful for noting down things that you do not want to forget, e.g. where/how you got the data for a specific answer.

The screenshot shows the 'Survey on National Contributions to EOSC and Open Science 2025' interface. At the top, there's a header with the EOSC logo, navigation links (About, Explore, Country pages, Resources, Contact), and a user profile 'EOSC SB (Greece)' with a 'SM' icon. The main content area has a title 'Survey on National Contributions to EOSC and Open Science 2025' and a description of the survey's purpose and structure. Below this is a tabbed interface with 'Policies 3' selected, and a 'SAVE' button. A sidebar on the left lists sections: Publications, Data (selected), Software, Services, Infrastructure, Skills/Training, Assessment, and Engagement. The main content area displays question 5: 'Does your country have a national policy on data management?'. It includes instructions, a glossary, and radio button options for 'Yes' and 'No'. A red circle highlights a comment icon in the top right corner of the question area. Below the question, there's a section for clarification with a text box containing information about the Hellenic Research Data Management Initiative (HARDMIN) in Greece.

Survey on National Contributions to EOSC and Open Science 2025

This survey consists of questions for monitoring policies and practices for EOSC and Open Science at national (and/or regional, where applicable) level in Europe. The survey is divided into four sections: Policies; Practices; General; Feedback. The sections on policies and practices are further divided into eight categories that are relevant for EOSC and Open Science: Publications; Data; Software; Services; Infrastructure; Skills/ Training; Assessment; Engagement. The data collected through the survey will be published in the [EOSC Observatory](#) and [EOSC Observatory Zenodo Community](#).

5. Does your country have a national policy on data management?

INSTRUCTIONS

Please reply 'Yes' if there is a national self-standing policy or law in this area or if such policy is included in an overarching policy or strategy (e.g. a national policy or strategy on Open Science). Examples of what should NOT be included: policies of specific institutions or groups of institutions (ie not adopted by the national public authority).

GLOSSARY

Policy: Any policies, recommendations, regulations, and laws that are relevant for EOSC and Open Science.

☐ Yes

☒ No

5.3. Please clarify your response if relevant

At the academic level, the Hellenic Research Data Management Initiative (HARDMIN) Data Repository is accessible to all academic and research institutions in Greece. A comprehensive deposit policy governs its use, outlining principles for data submission, access levels, licensing, metadata requirements, and long-term preservation. The full policy is available at: [hardmin.heal-link.gr](#)

Notes on the commenting functionality

1. Comments are not part of the actual survey, therefore they are not available to people outside your group (and the EC coordinators) and are not exported with the dataset.
2. Next year if you select to import your survey answer from this year you will be able to (optionally) import the comments as well.
3. We are also working on enabling mentions in the comments which will allow you to mention someone from your group to take a look at something and they will receive notifications through the communications module.
