

6. Importing a previous survey answer to a new survey

The 'Import' option on a survey lets you import the answers from a previous survey. Keep in mind that using this functionality will overwrite any answers that you have previously filled in, so it is a good practice to do it at the beginning. If for some reason you do it after and then change your mind, you can always restore the previous version as shown in the previous section.

Survey on National Contributions to EOSC and Open Science 2025

This survey is aimed at the EOSC Steering Board whose members are representatives of Member States and Associated Countries in the EOSC Governance. The survey consists of questions for monitoring policies and practices for EOSC and Open Science at national level in Europe. EOSC Steering Board members have the role of 'managers' for their country responses and can assign 'contributors' to help to respond to the questions for their country.

 History

Select the survey you want (every year more surveys will be added here, and you can select the one that is closer to the answers for the current year) and click 'Import'.

The screenshot displays the EOSC Open Science Observatory web application. A modal window titled "Import data from previous survey" is centered on the screen. The modal contains the following text: "You can use a previous survey answer to prefill the current one. Keep in mind that this selection will overwrite any changes that you may have previously made on the current survey. Select the survey that you want to use as a prefill choice from the list below:". Below this text are three radio button options: "Survey on National Contributions to EOSC and Open Science 2024", "Survey on National Contributions to EOSC and Open Science 2023", and "Survey on National Contributions to EOSC 2022". At the bottom of the modal are two buttons: "CANCEL" and "IMPORT".

The background interface shows a sidebar with navigation links: Home, My Surveys, My Group, EOSC-SB Surveys, Messages, Support, Privacy policy, and Use Policy. The main content area is divided into two sections: "Current survey(s)" and "Previous survey(s)".
